**Human Machine Interface Terminals** 

# Bright Touchscreens Offer Real Value and Flexible Application Provides the functions sought in new displays

### **Features**

- 5.7 to 15 inch sizes are available.
- A hand-held version of the NS5 is now available to perform operations at the production site. The NS-series HMI's
  have a complete set of functions that can be used at the production site.
- The Smart Active Parts (SAP Library) makes it easy to connect to OMRON PLCs and components,
   OMRON provides a development environment that requires with no programming and no screen designing.
- When an error occurs in a Unit in the OMRON PLCs, the Troubleshooter SAP Library provides an easy-tounderstand explanation of the cause of the error as well as the countermeasures.
- Ladder Monitor come as a Standard Feature. The ladder program can be monitored onsite without a laptop!Ladder monitor lets you monitor PLC program status, search for addresses or instructions, monitor multiple I/O points, and much more.
- Provides the FA integrated tool package "CX-One" for a Screen Design Software Integrated Simulation come as a Standard Feature. The integrated simulation function simulates ladder programs and screen data simultaneously even without the actual hardware.
- Screens support 42 languages and the Support Software supports eight. System messages can be displayed in eight languages.
- Single Port Multi Access (SPMA) come as a Standard Feature. The ladder program and screen data can be transferred from a single port!
- Connectable PLCs and devices appear one after another.
   Has become connectable with the PLCs of Mitsubishi Electric Corporation and the Inverters of OMRON Corporation.

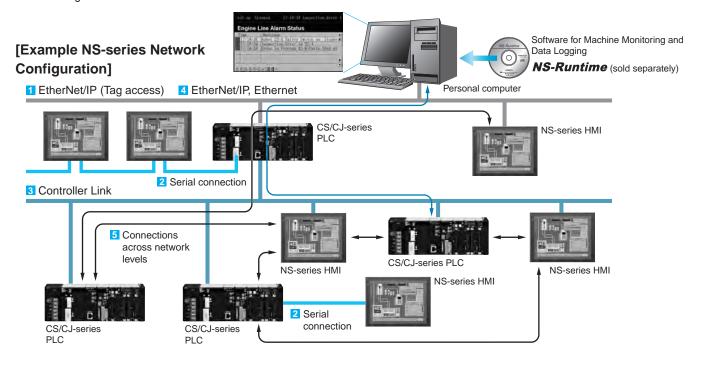

Sysmac is a trademark or registered trademark of OMRON Corporation in Japan and other countries for OMRON factory automation products. Windows is registered trademarks of Microsoft Corporation in the USA and other countries.

EtherCAT® is a registered trademark and patented technology, licensed by Beckhoff Automation GmbH, Germany.

Other company names and product names in this document are the trademarks or registered trademarks of their respective companies.

### **Network**

Provides serial NT Link communications supporting both 1:1 and 1:N connections. The NT Link has more efficient communications than Host Link and its capabilities are especially apparent in applications with multiple HMIs connect to the PLC. The NS-series HMIs can also support communications with multiple PLCs and multiple NS-series HMIs through Controller Link and Ethernet connections, so the network can be configured freely to match the requirements and scale of the application. In addition, using the NS-Runtime makes it possible to monitor machine status and log data from the host.

# Configuration of CJ2 series, NJ series and NX series

### 1 EtherNet/IP Connection (Tag accesses)

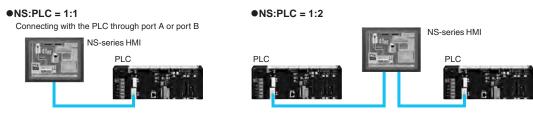

If an Ethernet-compatible NS-series HMI is used, the HMI can connect to a Controller with built-in EtherNet/IP and an Option Unit is not needed to connect at the HMI.

# Configuration of CS series, CJ series and CP series

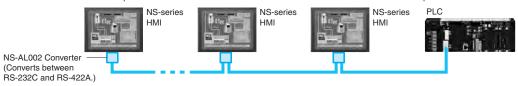

### 2 Serial connection

### 1:1 NT Link or Host Link

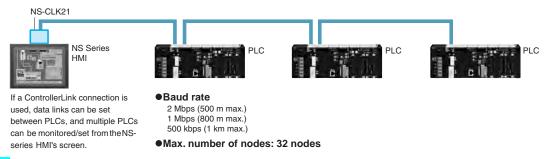

#### 1:N NT Link

•NS:PLC ratio = 8:1 max. Up to 8 NS-series PTs can be connected to each of the PLC's RS-232C/RS-422A ports.

### 3 Controller Link Connection

The HMI can be connected to an OMRON Controller Link network by mounting a Controller Link Interface Unit.

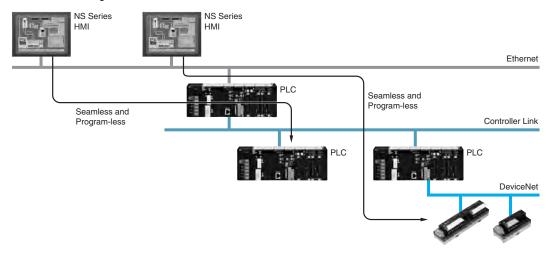

### 4 EtherNet/IP or Ethernet Connection

If an Ethernet-compatible NS-series HMI is used, the HMI can connect to a PLC with an Ethernet Unit and an Option Unit is not needed to connect at the HMI.

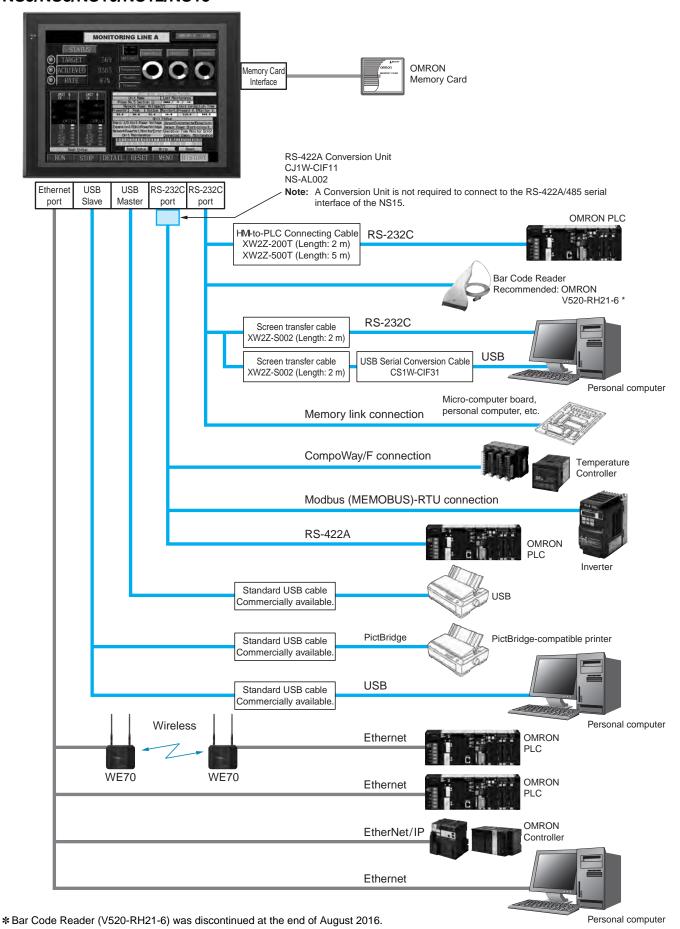

### 5 Connections Over Network Levels

The NS-series HMIs can connect to a variety of devices in the network, through as many as 3 network levels. For example, if SAP (Smart Active Parts) are being used, an NS-series HMI connected by Ethernet can be used to monitor the information in a PLC connected through Controller Link as well as the information in the DeviceNet Slaves connected to that PLC.

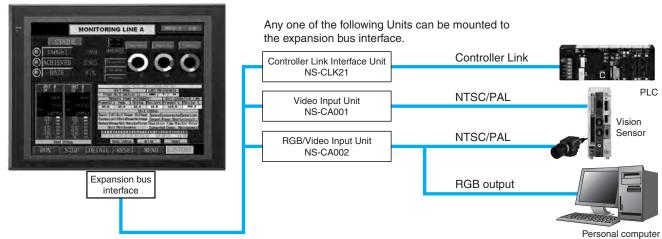

# **System Configuration**

### NS5/NS8/NS10/NS12/NS15

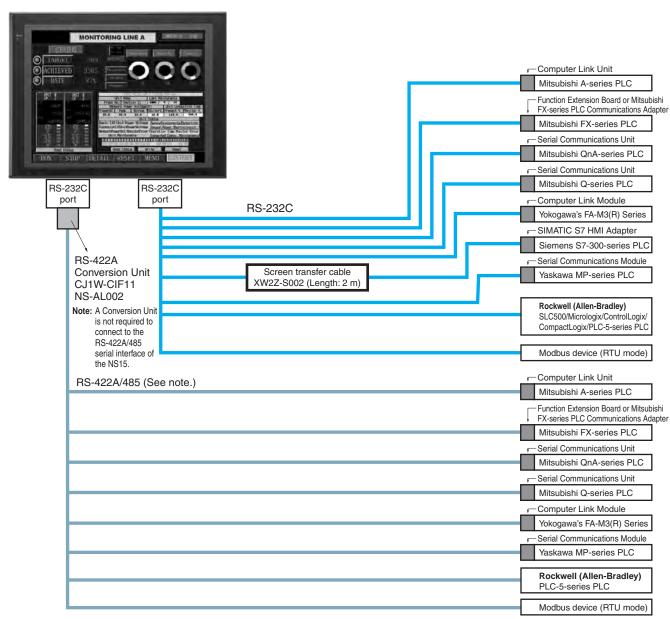

Web: https://www.bolenscontrol.com/ - Phone: (800) 658-5241 - Email: sales@bolenscontrol.com

# **Expansion Bus Interface**

Note: Video Input Units and RGB Video Input Units cannot be used with some models.

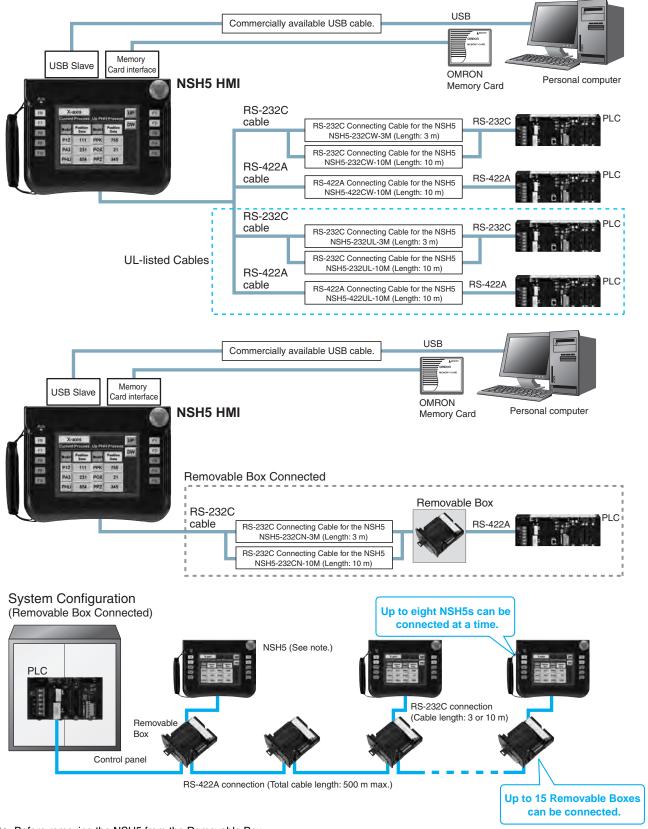

### **Multi-vendor**

Note: Whether an RS-422A or RS-485 connection is supported depends on the device that you are connecting to.

For details, refer to the Connectable Devices page or NS-Series Programmable Terminals HOST CONNECTION MANUAL Multivendor Connection (Cat.V092).

### **NSH5 Hand-held HMI**

Note: Before removing the NSH5 from the Removable Box, be sure to first turn OFF the power supply key on the Removable Box.

# **Ordering Information**

### **International Standards**

- The standards are availabled as follows: U: UL, U1: UL (Class I Division 2 Products for Hazardous Locations), C: CSA, UC: cULus, UC1: cULus (Class I Division 2 Products for Hazardous Locations), CU: cUL, N: NK, L: Lloyd, and CE: EC Directives.
- Contact your OMRON representative for further details and applicable conditions for these standards.

### **Programmable Terminals**

### **NS-Runtime**

Product name	Specifications	Media	Model	Standards	
		1license		NS-NSRCL1	
NS-Runtime	NS-Runtime Installer, PDF manual, hardware key (See note.)	3 licenses	CD	NS-NSRCL3	<u> </u>
		10 licenses		NS-NSRCI 10	1

Note: A hardware key (USB dongle) is required for NS-Runtime operation.

### System Requirements

Item	Specifications					
OS * Windows 7 (32-bit/64-bit version)/Windows 8 (32-bit/64-bit version)/Windows 10 (32-bit/64-bit version)						
CPU	Celeron, 1.3 GHz or higher (Recommended)					
Memory size	HDD: 50 MB min., RAM: 512 MB min. (Windows 7: 1 GB min.). 50 MB is required for the Runtime alone. (An additional 280 MB is required if CX-Server is not already installed.)					

\* Ver. 1.30 or later of NS Runtime do not support Windows XP (Service Pack 3 or higher) and Windows Vista.

<sup>\*2.</sup> Lot No. 15Z0 or later of NS5 color-type models, Lot No. 28X1 or later of NS8 models, Lot No. 11Y1 or later of NS10 models, Lot No. 14Z1 or later of NS12 models, LotNo.31114K or later of NS15 models.

### **Software**

### ●How to Select Required Support Software for Your Controller

The required Support Software depends on the Controller to connect. Please check the following table when purchasing the Support Software.

Item	Omron PLC System	Omron Machine Automation Controller System
Controller	CS, CJ, CP, and other series	NJ-series and NX-series
Programmable Terminals	NS-series	NS-series with an Ethernet port
Software	FA Integrated Tool Package CX-One	Automation Software Sysmac Studio

### ●FA Integrated Tool Package CX-One

Product name	The CX-One is a comprehensive software package that integrates Support Software for OMRON PLCs and components.  CX-One runs on the following OS. Windows XP (Service Pack 3 or higher, 32-bit version) / Windows Vista (32-bit version)		Media	Model	Standards
FA Integrated Tool Package CX-One Ver.4.□	CX-One runs on the following OS. Windows XP (Service Pack 3 or higher, 32-bit version) / Windows Vista (32-bit/64-bit version) / Windows 7 (32-bit/64-bit version) / Windows 8 (32-bit/64-bit version) / Windows 8.1 (32-bit/64-bit version) / Windows 10 (32-bit/64-bit version) CX-One Version 4.□ includes CX-Designer Ver.3.□. For details, refer to the CX-One catalog (Cat. No. R134)	1 license *	DVD	CXONE-AL01D-V4	-

<sup>\*</sup>Multi licenses (3, 10, 30, or 50 licenses) and DVD media without licenses are also available for the CX-One.

### Automation Software Sysmac Studio

Please purchase a DVD and required number of licenses the first time you purchase the Sysmac Studio. DVDs and licenses are available individually. Each model of licenses does not include any DVD.

	Specifications				
Product name	The Sysmac Studio provides an integrated development environment to set up, program, debug, and maintain NJ/NX Series CPU Units, NY-series Industrial PC, Controllers and other Machine Automation Controllers, as well as EtherCAT slaves.  Sysmac Studio tandard Edition  Yumdows 7 (32-bit/64-bit version) / Windows 8 (32-bit/64-bit version) / Windows	Number of licenses	Media	Model	Standards
Cuamaa Shudia	program, debug, and maintain NJ/NX Series CPU Units, NY-series Industrial PC, Controllers and other Machine Automation Controllers, as well as EtherCAT slaves.	- (Media only)	DVD	SYSMAC-SE200D	_
Standard Edition Ver.1.□					
	The Sysmac Studio Standard Edition DVD includes Support Software to set up EtherNet/IP Units, DeviceNet slaves, Serial Communications Units, and Support Software for creating screens on HMIs (CX-Designer). For details, refer to the Sysmac Integrated Catalogue (P072).	1 license *	_	SYSMAC-SE201L	_

Note: To connect the NJ5 Controller, NS system version 8.5 or higher is required. CX-Designer version 3.3 or higher is also required.

To connect the NJ1/NJ3 Controller, NS system version 8.61 or higher is required. CX-Designer version 3.4 or higher is also required.

To connect the NX7 Controller, NS system version 8.9 or higher is required. CX-Designer version 3.64 or higher is also required.

To connect the NX1P2 controller, NS system version 8.93 or higher is required. CX-Designer version 3.70 or higher is also required.

\* Multi licenses are available for the Sysmac Studio (3, 10, 30, or 50 licenses).

### **Cable**

Product name	Specifications		Model	Standards
Cable *1	Screen transfer cable for DOS/V (CX-Designer $\leftrightarrow$ PT)	Length: 2 m	XW2Z-S002	-
	USB-Serial Conversion Cable	Length: 0.5 m	CS1W-CIF31	N
	USB relay cable	Length: 1 m	NS-USBEXT-1M	
	RS-422A cable (loose wires + D-Sub 9-pin)	Length: 10 m	NSH5-422CW-10M	_
NSH5 Cables	RS-232C cable (loose wires + D-Sub 9-pin)	Length: 3 m	NSH5-232CW-3M	
	RS-232C cable (loose wires + D-Sub 9-pin)	Length: 10 m	NSH5-232CW-10M	
	RS-422A cable (loose wires)	Length: 10 m	NSH5-422UL-10M	
UL-compliant NSH5 Cable	RS-232C cable (loose wires + relay cable)	Length: 3 m	NSH5-232UL-3M	CU
None Gable	RS-232C cable (loose wires + relay cable)	Length: 10 m	NSH5-232UL-10M	
	HMI connection: 9 pins	Length: 2 m	XW2Z-200T	
HMI-to-PLC	PLC connection: 9 pins	Length: 5 m	XW2Z-500T	
Connecting Cable *2	HMI connection: 9 pins	Length: 2 m	XW2Z-200T-2	
	PLC peripheral port	Length: 5 m	XW2Z-500T-2	
NSH5 Removable Box	RS-232C Cable (connectors)	Length: 3 m	NSH5-232CN-3M	_
Cable	NO-2020 Gable (confinectors)	Length: 10 m	NSH5-232CN-10M	
NSH5 Removable Box	_		NSH5-AL001	
NSH5 Wall-mounting Bracket	-		NSH5-ATT02	
NSH5 Visor	-		NSH5-ATT01	

<sup>\*1.</sup> Use a standard USB Type A male to Type B type male Cable to connect the NS series HMI to a personal computer (CX-Designer). We recommend that you use a USB cable with a ferrite core attached to ensure stable communications. (Examples: FH-VUAB from OMRON and U2C-BF series (US2-BF BBK) from ELECOM as of February 2016)
Use a standard USB cable to connect the NS series HMI to a PictBridge-compatible printer. USB cable type depends on the printer.

<sup>\*2.</sup> To connect the NS series HMI to NJ series Controller, using a commercially available 10/100-BASE-TX twisted-pair cable. For detail, refer to the NS series SETUP MANUAL (Cat. No.V083).

<sup>\*1.</sup> NS5-TQ series (high luminance TFT) luminance is better than that of NS5-SQ series by about 110 cd/m<sup>2</sup>.

**<sup>\*2.</sup>** Contact your nearest OMRON representative to replace the backlight.

<sup>\*3.</sup> This is the estimated time before brightness is reduced by half at room temperature and humidity. It is not a guaranteed value. The service life will be dramatically shortened if HMI is used at low temperatures. For example, using the HMI at temperatures of 0°C will reduce the service life to approximately 10,000 hours (reference value).

<sup>\*4.</sup> Lot No. 15Z0 or later of NS5 models.

**<sup>\*5.</sup>** This function does not indicate that the service life has been reached. It detects when the backlight is not lit due to a disconnection or other errors.

Backlight error detection indicates that all backlights (2) are OFF.

- Contact your nearest OMRON representative to replace the backlight.
- \*2. This is the estimated time before brightness is reduced by half at room temperature and humidity. It is not a guaranteed value.

  The service life will be dramatically shortened if HMI is used at low temperatures. For example, using the HMI at temperatures of 0 °C will reduce the service life to approximately 10,000 hours (reference value)
- \*3. Lot No. 28X1 or later of NS8 models, Lot No. 11Y1 or later of NS10 models, Lot No. 14Z1 or later of NS12 models, Lot No. 31114K or later of NS15 models.
- \*4. This function does not indicate that the service life has been reached. It detects when the backlight is not lit due to a disconnection or other errors. Backlight error detection indicates that all backlights (2) are OFF.
- \*5. An analog touch panel is used with the NS15. Do not press the touch panel in two or more places simultaneously. If the touch panel is pressed in two or more places simultaneously, it may activate a switch between the points that are pressed.

# **Communications**

# NS5/NS8/NS10/NS12/NS15

		Interface	One ATA-Compact Flash interface slot				
Memory Card		Functions	Used to transfer and store screen data, store logging data, and store history data. (Alarm/Event History, Operation Log, and Error Log generated during Macro execution).				
		Connector	Conforms to EIA RS-232C. D-Sub female 9-pin connector 5-V output (250 mA max.) through pin 6. The 5-V outputs of serial ports A and B cannot be used at the same time.				
Serial	Port A	Functions	Host (PLC) access: 1:N NT Links (connections with CS/CJ/CP-series PLCs and C200HX/HG/HE(-Z) PLCs), 1:1 NT Links, or Host Link (connections with C Series or CVM1/CV-series PLCs) Direct access to Temperature Controllers using Smart Active Parts: CompoWay / F and bar code reader connections (Read directly from display.)				
Communications		Connector	Conforms to EIA RS-232C. D-Sub female 9-pin connector. 5-V output (250 mA max.) through pin 6. The 5-V outputs of serial ports A and B cannot be used at the same time.				
	Port B	Functions	Host (PLC) access: 1:N NT Links (connections with CS/CJ/CP-series PLCs and C200HX/HG/HE(-Z) PLCs) or 1:1 NT Links (connections with C Series or CVM1/CV-series PLCs)  Direct access to Temperature Controllers using Smart Active Parts:  CompoWay / F and bar code reader connections (Read directly from display.)				
			USB1.1				
USB		Connector	TYPE-B (Slave)				
SLAVE Specifications	Functions		Connection with the CX-Designer (for screen data transfers) Connecting to a PictBridge-compatible Printer Recommended printers: EPSON: PM-G4500, PX-G5300, PX-5600, EP-901F  Canon: PIXUS MX7600, PIXUS iP100, PIXUS iX5000				
			USB1.1				
USB HOST		Connector	TYPE-A (Host)				
Specifications *1		Functions	Connection with a printer (for hard copies) Recommended printers: EPSON: PX-G930				
Built-in Ethernet Specifications *2			Conforms to IEEE 802.3/Ethernet (10 Base-T/100 Base-TX).				
Specifications 2		Functions	Host (PLC) access and connection with the CX-Designer (for screen data transfers)				
Controlled Link (M	!I	Baud rate	2 M/1 M/500 K bps				
Controller Link (Wired- type) Specifications *3		Transmission path	Shielded twisted-pair cable (special cable)				
		Functions	Host (PLC) access and data links				
Video Input Specifications *4		Resolution	NS-CA001: 320×240, 640×480, 800×600 dots NS-CA002: User-defined size				
		Input signal	NS-CA001: NTSC composite video or PAL NS-CA002: NTSC composite video or PAL				
		Number of video inputs	NS-CA001: Number of cameras: 4 max. NS-CA002: 2 cameras + RGB				

<sup>\*1.</sup> Except NS5.

\*2. NS - - 1-V2 only.

\*3. Except NS5 and NS8.

\*4. Except NS5 and NS15. NS15 provides RGB input. (NS-CA002)

- **\*1.** To connect a NS with a PLC via a RS-422A connection, OMRON's NS-AL002, or CJ1W-CIF11 RS-232C/RS-422A Converter can be used to convert the RS-232C port on the NS to RS-422A.
- **\*2.** A NS with Ethernet port is necessary.

When connecting a PLC with the NS, an Ethernet port is necessary on the PLC, too. Use a PLC CPU Unit with a built-in Ethernet port, or add an Ethernet Unit.

- **\*3.** A NS with Ethernet port is necessary.
  - When connecting a PLC with the NS, an EtherNet/IP port is necessary on the PLC, too. Use a PLC CPU Unit with a built-in EtherNet/IP port, or add an EtherNet/IP Unit.
- \*4. Install a Controller Link Interface Unit on the NS. A Controller Link Unit is necessary for the PLC.
- \*5. Mount a Serial Communications Unit on the NJ-series Controller. A NS can access only to the Controller's memory used for CJ-series unit.
- \*6. When using a EtherNet/IP Unit to connect the NJ-series Controller, NJ Troubleshooter is not supported.

### **Read and Understand This Catalog**

Please read and understand this catalog before purchasing the products. Please consult your OMRON representative if you have any questions or comments.

### **Warranty and Limitations of Liability**

#### WARRANTY

OMRON's exclusive warranty is that the products are free from defects in materials and workmanship for a period of one year (or other period if specified) from date of sale by OMRON.

OMRON MAKES NO WARRANTY OR REPRESENTATION, EXPRESS OR IMPLIED, REGARDING NON-INFRINGEMENT, MERCHANTABILITY, OR FITNESS FOR PARTICULAR PURPOSE OF THE PRODUCTS. ANY BUYER OR USER ACKNOWLEDGES THAT THE BUYER OR USER ALONE HAS DETERMINED THAT THE PRODUCTS WILL SUITABLY MEET THE REQUIREMENTS OF THEIR INTENDED USE. OMRON DISCLAIMS ALL OTHER WARRANTIES, EXPRESS OR IMPLIED.

#### LIMITATIONS OF LIABILITY

OMRON SHALL NOT BE RESPONSIBLE FOR SPECIAL, INDIRECT, OR CONSEQUENTIAL DAMAGES, LOSS OF PROFITS OR COMMERCIAL LOSS IN ANY WAY CONNECTED WITH THE PRODUCTS, WHETHER SUCH CLAIM IS BASED ON CONTRACT, WARRANTY, NEGLIGENCE. OR STRICT LIABILITY.

In no event shall the responsibility of OMRON for any act exceed the individual price of the product on which liability is asserted.

IN NO EVENT SHALL OMRON BE RESPONSIBLE FOR WARRANTY, REPAIR, OR OTHER CLAIMS REGARDING THE PRODUCTS UNLESS OMRON'S ANALYSIS CONFIRMS THAT THE PRODUCTS WERE PROPERLY HANDLED, STORED, INSTALLED, AND MAINTAINED AND NOT SUBJECT TO CONTAMINATION, ABUSE, MISUSE, OR INAPPROPRIATE MODIFICATION OR REPAIR.

### **Application Considerations**

#### SUITABILITY FOR USE

OMRON shall not be responsible for conformity with any standards, codes, or regulations that apply to the combination of products in the customer's application or use of the products.

At the customer's request, OMRON will provide applicable third party certification documents identifying ratings and limitations of use that apply to the products. This information by itself is not sufficient for a complete determination of the suitability of the products in combination with the end product, machine, system, or other application or use.

The following are some examples of applications for which particular attention must be given. This is not intended to be an exhaustive list of all possible uses of the products, nor is it intended to imply that the uses listed may be suitable for the products:

- Outdoor use, uses involving potential chemical contamination or electrical interference, or conditions or uses not described in this catalog.
- Nuclear energy control systems, combustion systems, railroad systems, aviation systems, medical equipment, amusement machines, vehicles, safety equipment, and installations subject to separate industry or government regulations.
- Systems, machines, and equipment that could present a risk to life or property.

Please know and observe all prohibitions of use applicable to the products.

NEVER USE THE PRODUCTS FOR AN APPLICATION INVOLVING SERIOUS RISK TO LIFE OR PROPERTY WITHOUT ENSURING THAT THE SYSTEM AS A WHOLE HAS BEEN DESIGNED TO ADDRESS THE RISKS, AND THAT THE OMRON PRODUCTS ARE PROPERLY RATED AND INSTALLED FOR THE INTENDED USE WITHIN THE OVERALL EQUIPMENT OR SYSTEM.

#### PROGRAMMABLE PRODUCTS

OMRON shall not be responsible for the user's programming of a programmable product, or any consequence thereof.

### Disclaimers

#### **CHANGE IN SPECIFICATIONS**

Product specifications and accessories may be changed at any time based on improvements and other reasons.

It is our practice to change model numbers when published ratings or features are changed, or when significant construction changes are made. However, some specifications of the products may be changed without any notice. When in doubt, special model numbers may be assigned to fix or establish key specifications for your application on your request. Please consult with your OMRON representative at any time to confirm actual specifications of purchased products.

#### **DIMENSIONS AND WEIGHTS**

Dimensions and weights are nominal and are not to be used for manufacturing purposes, even when tolerances are shown.

#### PERFORMANCE DATA

Performance data given in this catalog is provided as a guide for the user in determining suitability and does not constitute a warranty. It may represent the result of OMRONÅfs test conditions, and the users must correlate it to actual application requirements. Actual performance is subject to the OMRON Warranty and Limitations of Liability.

#### **ERRORS AND OMISSIONS**

The information in this document has been carefully checked and is believed to be accurate; however, no responsibility is assumed for clerical, typographical, or proofreading errors, or omissions.

Note: Do not use this document to operate the Unit.
