J & JW Series

J & JW Series

The **J Series** enclosures follow the original design of fiberglass enclosure products featuring a modest overhang cover on a flange mounted base. This simple but elegant concept offers unobstructed side-walls, built in mounting capabilities and the strength characteristics associated with a protective wrap around cover that is hinged, latched or screwed down.

Stahlin's **J Series** enclosures are designed for general electrical and electronic applications and any application that has associated environmental concerns. Simple in its design, the enclosure can be configured with cutouts, windows and modifications that make your finished product truly unique.

J Series products enhance any instrument installation. They accommodate standard back panel mounting but offer a range of panels, including an elevated dead front panel that is highly visible through a cover mounted window.

Attributes

- Available in 2 cover options on certain size enclosures:
 1. Opaque cover
 2. Flush bonded window
- Overhang cover on smooth sided base
- High temperature, flame retardant, non-corrosive
- All stainless hardware latches and screws
- Full length stainless steel hinge
- Chemically resistant fiberglass reinforced polyester
- Non-corrosive, environmental designs
- Stainless steel retention chain on screw covers
- Continuous polyurethane gasket
